

To assemble the bed you require

- drill-driver, Philips screwdriver, 8mm hex key, hammer, two adults.
- Head end – 1 pcs. (2 parts)
- Foot end – 1 pcs.
- Side rail – 2 pcs.
- Stringer with legs – 1 pcs.
- Head end cross bar
- Maxifix cam – 8 pcs.
- Maxifix coupling – 8 pcs.
- Maxifix bolt – 8 pcs.
- Stablising pin – 16 pcs.
- Through-bold – 2 pcs.
- Through-bold nut – 4 pcs.
- Nut with washer – 8 pcs.
- 4mm hex key

1. Step

First assemble the two head end parts together with the delivered through-bolts. At the back of the head end there are two holes and two through-bolts with round nuts.

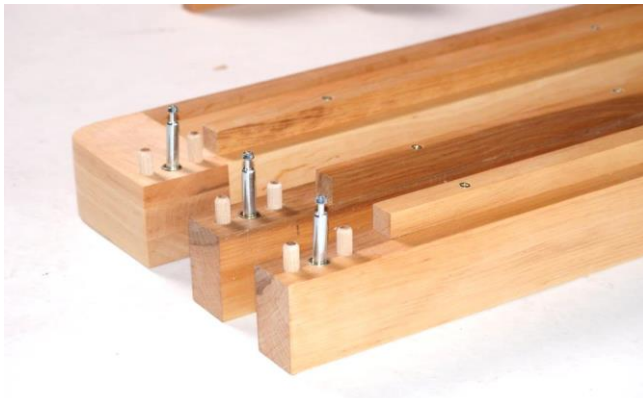

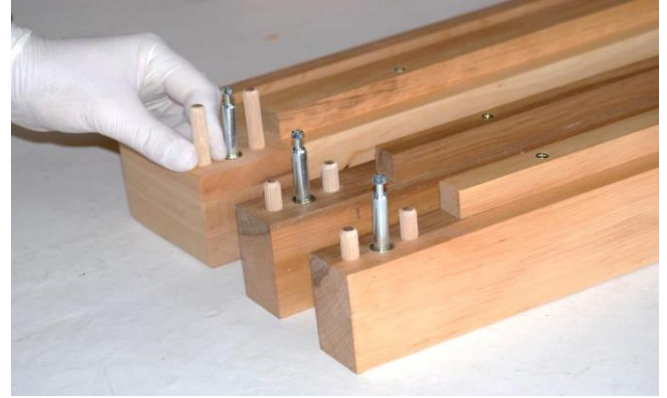

Allgemeiner Sicherheitshinweis:

Nicht mehr benötigte Verpackungsmaterialien und Kleinteile von Kindern fernhalten! Schwere Elemente nicht alleine heben!

2. Step

Screw the Maxifix couplings with the 8 mm hex key to all of the middle holes of the frame. (IMPORTANT: The coupling has to be screwed until it's aligned with the wood surface (no deeper). Screw the Maxifix bolts to the coupling and fit the stabilising pins in the holes on both sides of the coupling with the bolt, so that the elements look as illustrated below:

3. Step

Turn all the elements to make the 35 mm diameter holes visible, and insert Maxifix cams to the holes in such a way that the arrow on the cam is turned in the direction of the smaller hole connecting the cam with the element's edge.

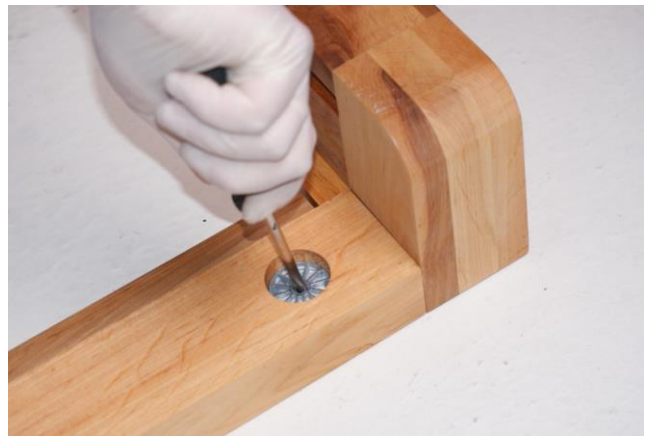

Allgemeiner Sicherheitshinweis:

Nicht mehr benötigte Verpackungsmaterialien und Kleinteile von Kindern fernhalten! Schwere Elemente nicht alleine heben!

4. Step

Now assemble all the frame elements in a way that the bolts enter the cams in the adjacent parts and push together, so that the elements adjoin. It is important to first assemble the cross bar between the head end parts and then the cross bar from the foot end parts. When the elements are tightly adjoined, turn the cams clockwise with the use of a screwdriver. In order to make the connection secure, the cam must be turned at least $\frac{3}{8}$ of a turn.

5. Step

On the prepared frame mount the shelves with the use of the Maxifix couplings and stabilising pins – similarly to the procedure of frame assembly.

Allgemeiner Sicherheitshinweis:

Nicht mehr benötigte Verpackungsmaterialien und Kleinteile von Kindern fernhalten! Schwere Elemente nicht alleine heben!

6. Step

Now place the previously assembled head end with its front facing upwards on the floor and ask another person to help you in lifting the frame in a way, that the screws mounted in the head end cross bar and shelves are facing downwards. Make sure the mounted screws protrude from the holes at least 6 cm. Carefully attach the frame to the head end so that the screws enter the holes in the head end. This may require a bit more force than the other assembly procedures. It is important to lower the frame equally on both sides. If you encounter problems with this procedure, check if the head end elements are properly assembled and try again. The frame should be tightly adjoined to the head end along the whole length.

7. Step

Now the frame should be placed on the floor very carefully. One person should be slowly lowering the foot end while the other should be lifting the head end. This action should be performed at an equal pace, as the head end is not yet bolted to the frame and may be damaged. As the frame is placed in the proper position, the head end should be mounted:

install the washers and the nuts on the screws, which now should be at the back of the head end.

Insert the racks, so that its bars are lengthways to the bed and the tapes connecting the bars are facing downwards.

We wish you a pleasant sleeping!

D - Allgemein

Achten Sie bitte auf regelmäßige Lüftung der Räume.

Zu trockene Luft fördert das Verziehen der Hölzer.

Feuchtigkeit und Nässe sofort mit einem trockenen Tuch abwischen.

Alle Oberflächen bitte nicht mit scharfen oder spitzen Gegenständen beschädigen.

Oberflächen bitte nicht mit scharfen Putz- oder Reinigungsmitteln behandeln.

Zur Reinigung der Oberflächen verwenden Sie bitte lediglich ein angefeuchtetes Tuch.

Dieses Produkt ist nur für den Einsatz in Privathaushalten konzipiert.

Massivholz

Feine Äste, Verwachsungen und kleine Risse sind naturbedingt und kein Reklamationsgrund.

Farbdifferenzen und verschiedene Maserungsverläufe zeugen von der Echtheit des Holzes und sein kein qualitativer Mangel.

Lackierte Oberflächen

Gegenstände bitte nicht ohne geeigneten Untersetzer auf den Oberflächen abstellen.

Eventuell sichtbare Polier und Schleifspuren sind produktionsbedingt und stellen keinen qualitativen Mangel dar.

Geölte und gewachste Oberflächen

Vermeiden Sie bitte Staunässe auf der Oberfläche und entfernen Sie Getränkereste sofort.

GB - General

Please make sure that your rooms are ventilated regularly.

Very dry or very humid air will support the warping of wooden products.

Wipe off liquids and moist spots immediately with a soft and dry cloth.

Prevent sharp and pointed objects from direct contact with the surface.

Do not use washing powders or any other substances containing abrasives to clean the surface.

This product is conceived only for private household.

Solid wood

Little knots, connotation and little cracks in the wood are typical natural characteristic of wood and not a reason for a claim.

Differences in color and grain are also typical for solid wood and not a qualitative defect.

Lacquered surfaces

Please don't put any item without table mat on the surface, it could cause heavy scratches. Maybe visible polish marks are conditions of production and not a reason for a claim.

Oiled an waxed surfaces

Please take care of wetness on the surface and clean it at once.
